

## **Onboarding Management Platform**

powered by workrunner.io

### **Low-code Application Environment**

Operate in a highly responsive manner in today's fast-moving, ever-changing environment that presents multitude of challenges.

#### Customizable

Adapt to the evolving changes of your growing organization and address the requirements of the entire user community.

### **Collaboration**

Bring together all departments on a single platform. Address the requirements of the whole community.

### Scalable

Scale up or across using our modules to respond easily to organizational shifts, competitive threats, industry innovations and regulatory changes.

### Integration

Establish integrations with any third-party system or software for two-way data stream, automation and orchestration scenarios.

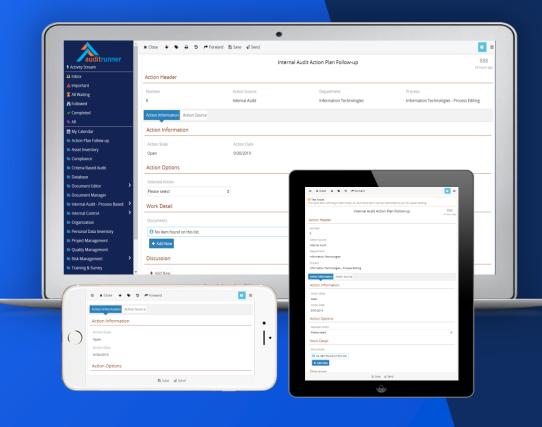

#### No installation

Access the same content and function using any kind of device, without any installation.

## Access with any device

- Web-based & responsive user interface
- No installation on end-user device
- No extra development for mobile view
- No extra licenses for mobile access
- Same content & same functionality

## **Process Oriented Approach**

# SS

WR OnBoard application helps companies automate the process of voluminous new partner, supplier, and client onboarding

on a single and unified digital platform.

### Increased Efficiency

Save considerable time and money at your operations

#### **Number of Vendors**

Number of Vendors increased dramatically from 3,000 to 60,000, i.e. by 20 fold in 2 years

#### **Time Savings**

Average duration of Vendor applications decreased from 5-7 days to 4 hours – 2 days.

#### **Resource Savings**

Onboarding department saved 40 man-days per employee over a year period.

#### **Vendor Satisfaction**

Vendor retention rate after the initial application raised by 18%.

### **Onboarding** Process

#### **Evaluation**

Applicant's products and services, are evaluated against pre-determined criteria like credit score and market reputation.

#### **Portfolio Details**

Vendor's products and services are analyzed and uploaded to be added into the portfolio

#### **Vendor Account**

All Vendor lifecycle communication, payments and action details are logged centrally.

#### **Application**

Vendor applications are gathered through different channels such as website and e-mail

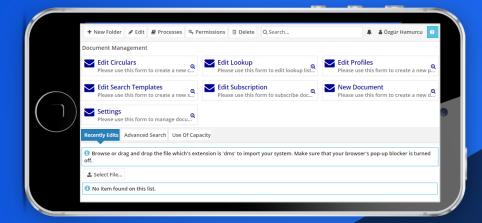

#### Registration

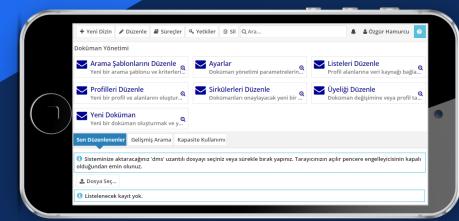

Approved Vendor shares documents and information to create a vendor account.

#### Control

Vendor's products and services are evaluated and positioned to an appropriate setting

# Multi-language Support

Use multiple languages at once

Every user can use his/her own language

Same content in different languages

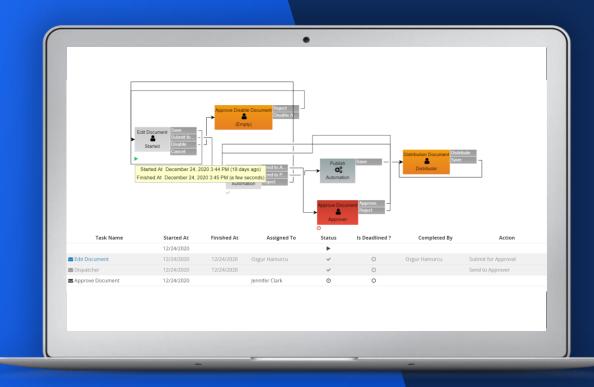

Same functions in different languages

## Track every action

- Track the action history of each and every workflow
- Report actions taken in different time zones
- Who completed what and when?
- Which action was taken?
- How much time is spent at every step?
- Has an action or a flow become **overdue?**
- Trackability, accountability & performance data

# Dashboards& Reports
