Workrunner
Solution Approach

Business perspective
Clearly understand and guide business units.

Continuous feedback & Solid progress
Short development cycles and frequent feedback to deliver continuous and solid progress without months-long schedules.

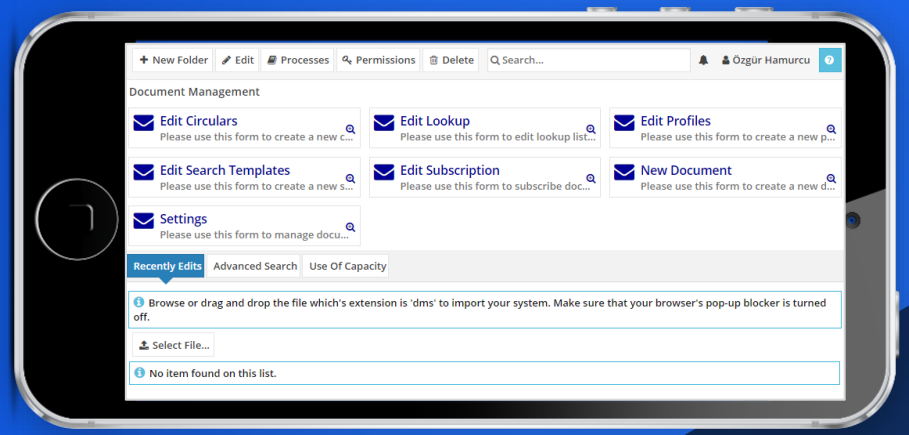
360° analysis of your business
Collaboration with not just IT departments but with business owners.

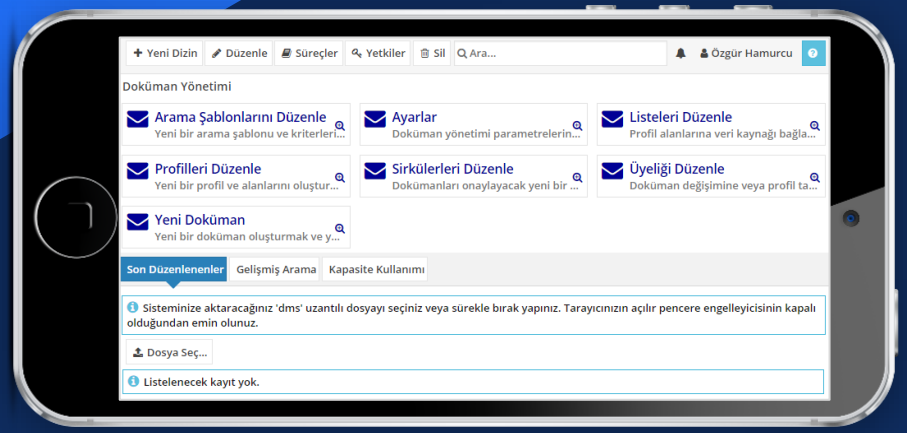
Save time and money
Low-code application platform enables delivery of adaptations and new developments in 1/3 time.

Improvements & Updates
Continuous upgrades and updates based on user feedback, to keep applications always aligned with ever-changing business needs.

workrunner.io

workrunner





Multi-language Support

Use multiple languages at once

Every user can use his/her own language

Same content in different languages

Same functions in different languages

workrunner.io

workrunner

Track
every action

- **Track the action history** of each and every workflow
- Report actions taken **in different time zones**
- **Who completed what and when?**
- **Which action** was taken?
- **How much time is spent** at every step?
- Has an action or a flow become **overdue?**
- **Trackability, accountability** & performance data

3000+

product projects handled

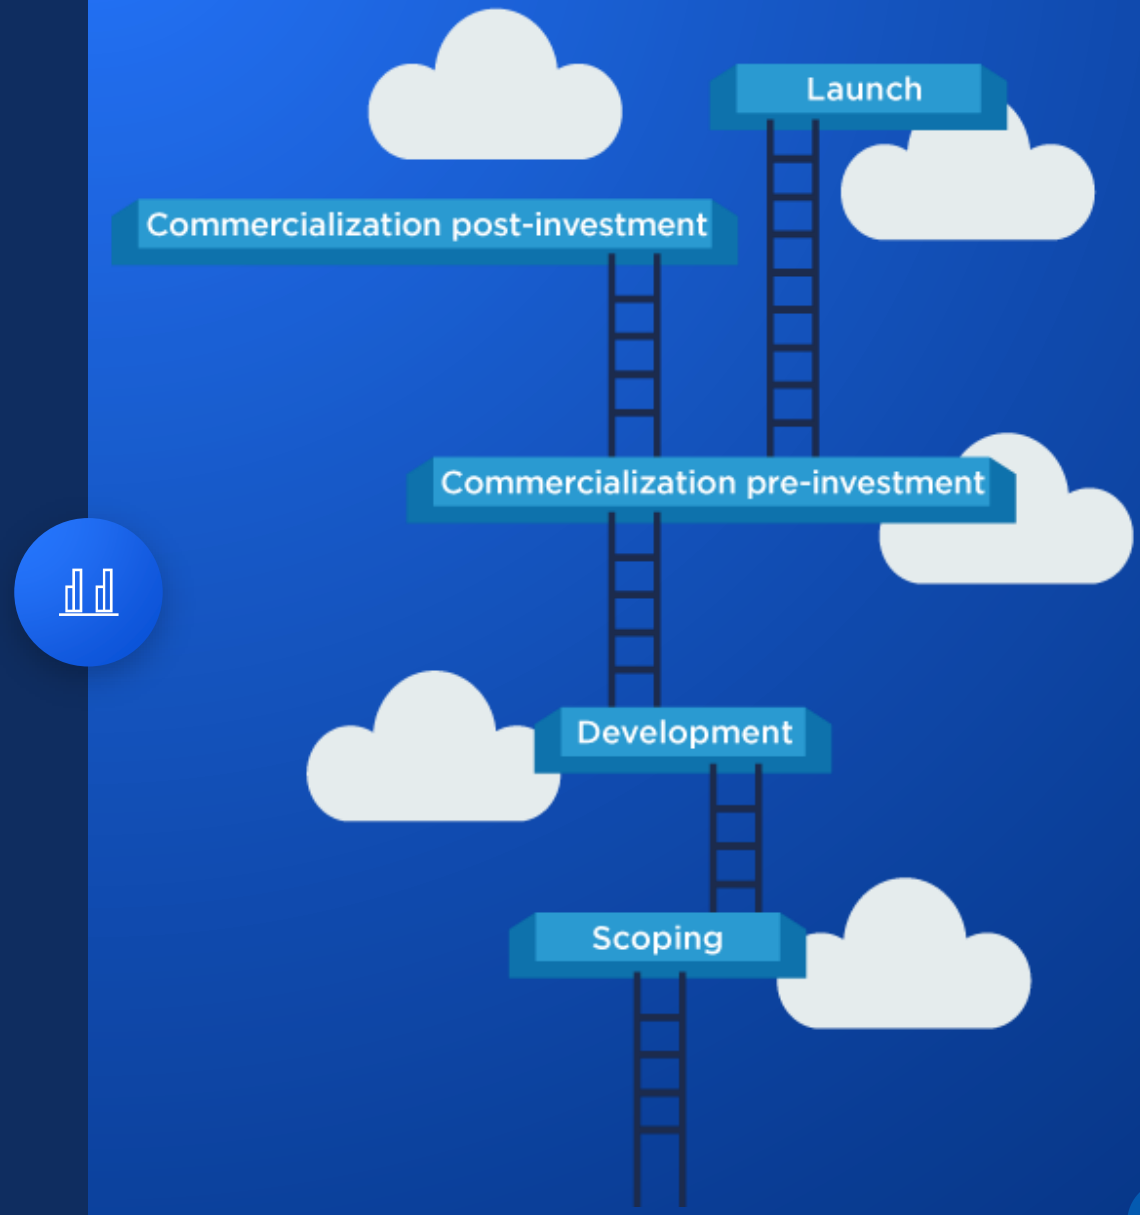
Stage-Gate® Ready

workrunner

workrunner.io

What is **Stage-Gate™?**

- Stage-Gate is a modular project management methodology, which is widely accepted especially among product development circles.
- A Stage-Gate project consists of predetermined and sequential steps, or “stages”. Each stage consists of a set of certain cross-functional and parallel activities which must be successfully completed prior to obtaining management approval to proceed to the next stage.
- At the end of each stage, the overall progress is sent for «gate» approval. These «gates», which are normally meetings, control the process and serve as:
  - Quality control of the completed stage
  - Go/No-Go check-points
  - Readiness-checks
  - Must-Meet and Should-Meet criteria
  - Marker for action plan for the next stage



workrunner.io

workrunner

Sample **Projects**
